Opening in local host

The screenshot shows a Visual Studio Code editor with a web application running in a browser. The browser tab is titled "Conversation engine for deaf and dumb". The code in the editor is an HTML file named "index.html" which includes Bootstrap CSS and a form with a "Forgot" button. The terminal shows the command to run the Flask app using "python webstreaming.py" and the output indicating the app is running on http://127.0.0.1:5000/.
